Las Vegas Artistry

From the bright lights of the casinos to the incredible vistas of the desert that surrounds the city, Las Vegas conjures up images of an enchanted wonderland. Prestige Pools understands the mystique of the town and incorporates a little bit of that magic into every project it creates.

In 1981, in response to an increasingly vocal appeal for an upscale pool builder in Las Vegas, Prestige Pools was formed. A team of professionals, craftsmen, a landscape architect and a structural engineer were selected to work with the company. From that day forward, Prestige Pools, has honed its reputation for crafting imaginative and enjoyable concepts for their clients.

The staff of Prestige Pools takes a personal and professional approach to every phase of the design and construction process. Clients know that they will receive

the finest products and services possible. Excellence is the standard, and for the discriminating homeowner, or the corporate account, Prestige Pools easily handles unique designs and all types of engineering dilemmas.

“Our focus is to skillfully craft the most exceptional project possible within the investment parameters,” declares William L. Palmer, president, “be it a swimming pool, spa or waterscape of some type.”

Having been granted an unlimited license from the Nevada State Contractors Board to construct projects of any magnitude and without any monetary limitations or restrictions, Prestige Pools has planned and built many of the swimming pools and spas in the city’s more notable residences. Some of its pools also grace the large hotels and casinos on the Las Vegas Strip, such as the Mirage and its famous tiger habitat. ❖

The ambiance is rich, just right for a nighttime soiree. The raised spa overlooks the pool area, which is balanced on both ends by glass blocks. The overall mood of this stylish poolscape is sophistication.

Floating above like a castle in the clouds, the house offers the best vantage of the pool below. The serpentine-shaped vanishing edge of this enigmatic pool provides a distinctive accent to the design of the residence.

SERVICE AREA

Las Vegas

Right out of a fairy tale, this dreamy poolscape is multi-tiered—and multi-faceted. Almost by magic, water from the raised play pool, surrounded by glass panels, flows down limestone troughs into a reflection pool.
