

# Las Vegas Artistry

Sophisticated and elegant, the smooth lines of this pool counteract the setting's lush landscaping. A steel gray interior finish adds a touch of contrast to the bubbling water feature and the pool, which are outlined with a pavestone decking.

From the bright lights of the casinos to the incredible vistas of the desert that surround the city, Las Vegas conjures up images of an enchanted wonderland. Prestige Pools understands the mystique of the town and incorporates a little bit of that magic into every project it creates.

In 1981, in response to an increasingly vocal appeal for an upscale pool builder in Las Vegas, Prestige Pools was formed. A team of professionals, craftsmen, a landscape architect and a structural engineer were selected to work with the company. From that day forward, Prestige Pools, a Master Pools Guild member, has honed its reputation for crafting imaginative and enjoyable concepts for their clients.

The staff of Prestige Pools takes a personal and professional approach to every phase of the design and construction process. Clients know that they will receive

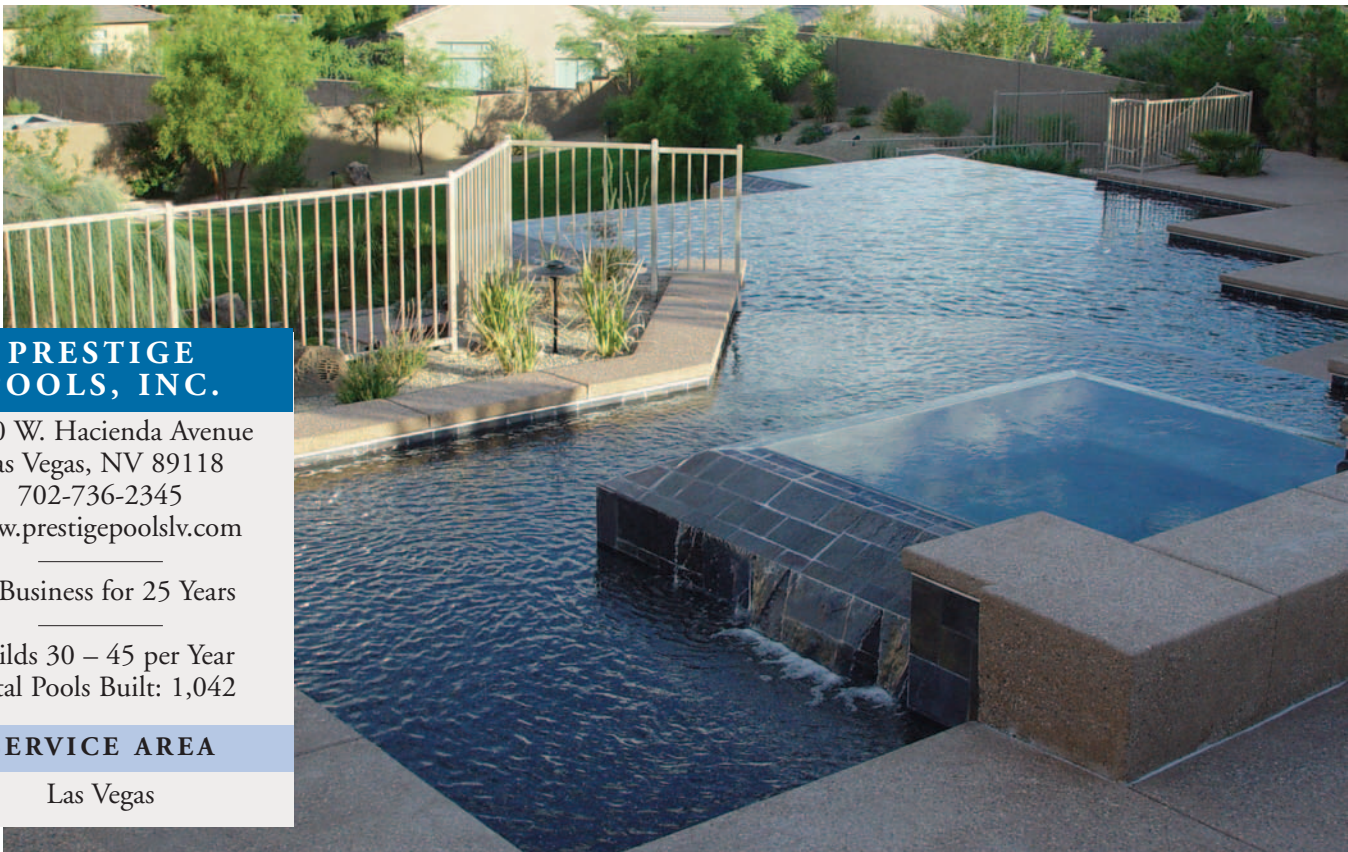

the finest products and services possible. Excellence is the standard, and for the discriminating homeowner or the corporate account, Prestige Pools easily handles unique designs and all types of engineering dilemmas.

"Our focus is to skillfully craft the most exceptional project possible within the investment parameters," declares William L. Palmer, president, "be it a swimming pool, spa or waterscape of some type."

Having been granted an unlimited license from the Nevada State Contractors Board to construct projects of any magnitude and without any monetary limitations or restrictions, Prestige Pools has planned and built many of the swimming pools and spas in the city's more notable residences. Some of its pools also grace the large hotels and casinos on the Las Vegas Strip, such as the Mirage and its famous tiger habitat. ❖

Stretching out along the deck, the 70 feet of this lap pool are finished with a steel gray aggregate interior. Red clay flumes set in a 3-ft. high retaining wall accent the poolscape's clean beauty.
